

## **GLASS STANDARDS COMPLIANCE**

Chevron Glass supplies products that conform to the following Australian Standards.

- Australian Standard AS 1288.  
“Glass in buildings – Selection and installation.”  
This standard sets out procedures for the selection and installation of glass in buildings.
- Australian Standard AS/NZS 2208.  
“Safety glazing materials in buildings.”  
This standard applies where safety glass is required by AS 1288. Safety glass must be manufactured in accordance with AS/NZS 2208.
- Australian Standard AS/NZS 4667.  
‘Quality requirements for cut-to-size and processed glass.’  
This standard sets out the quality requirements for cut-to-size ordinary annealed glass, tinted, toughened, laminated, patterned and wired glass.
- Australian Standard AS 4666.  
“Insulating glass units.”  
This standard sets out the requirements and guidelines for the selection and installation of insulating glass units (IGU’s) in buildings.
- Australian Standard AS 2080.  
“Safety glazing for land vehicles.”  
This standard specifies requirements for toughened and laminated glass for windscreens and other glazing for land vehicles.

All Australian Standards are available in electronic editions from [www.standards.com.au](http://www.standards.com.au)
