

Chevron Glass

Custom Laminated Products

CUSTOM LAMINATE GLASS YOUR WAY

Laminating provides a very wide range of glass options.

Combinations of glass can provide safety, security, strength, solar control, energy efficiency, decoration and special effects.

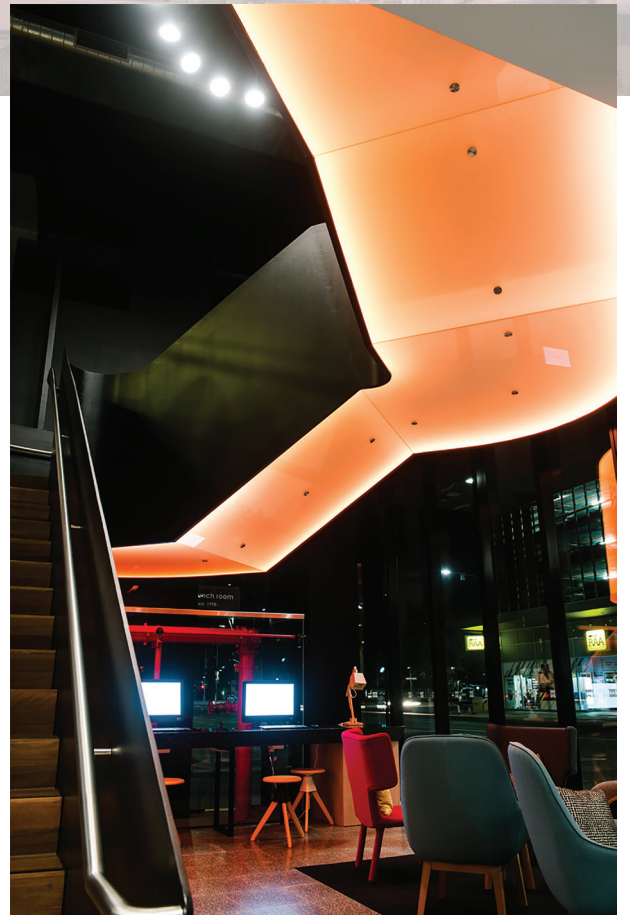

Toughened laminated glass is suitable for a variety of applications – Windows, doors, overhead canopies, balustrades, pool fences, special doors, partitions and feature panels. Engineered solutions, like glass roofs, glass floors & step treads for stair cases can also be manufactured.

Lamination can include annealed, heat strengthened, toughened and toughened heat soaked glass.

Standard lamination is available using 0.76mm and 1.52mm PVB interlayer.

Projects involving acoustic or structural interlays can be incorporated.

Digitally printed and fritted projects are our specialty.

MULTI LAMINATES ARE AVAILABLE

All Chevron Toughened Glass conforms to Australian Standard AS 2208 "Safety Glazing Materials in Buildings."
